

Bleepa is the only UKCA marked clinical collaboration platform that connects care settings with diagnostic and other data to drive better, faster, safer outcomes for patients.

Core functionalities

- Patient-centred communication – single view of relevant clinical information for review and discussion
- Versatile and interoperable – integrates with EPR, PACS, LIMS systems for cross-provider care delivery
- Fully auditable – discussion becomes part of the patient record
- Multiple media upload – add documents and images to referrals and patient discussion
- Safe, secure, compliant – zero footprint with no data stored locally on any devices
- Integrated with hospital systems to allow single-sign on
- Ease of access – Launch link from electronic patient record
- Web application – accessible from any device for access on the go

Clinical communication

- Secure asynchronous clinical chat that can fit around other clinical work
- Tag individuals or clinical teams for quick sharing
- Ideal for flexible multi-disciplinary discussions
- Delivery and read notifications

Pathway management

- Rule based tagging to manage patient list
- Structured referral forms that are fully configurable
- Patient status can be updated to referred, accepted, reviewed and discharged
- Patients can be tagged as urgent or breaching

Medical imagery

- DICOM/PACS view provides clinical grade imagery
- Annotate images directly
- Capture clinical photos directly in app via mobile device
- Patient consent module included and fully customisable

Dashboard view

- See patient status in a simple view
- Receive breach alerts
- Deep dive into case notes and test results
- Chat directly with colleagues

“Bleepa was really easy to use.”

“I was able to get up and running with hardly any training, just a quick conversation with a colleague who had already used it and the in-app help was enough.”

“I would really recommend Bleepa to other hospital trusts and clinical teams and I will thoroughly miss it when I go to work in other hospitals who don't have it!”

Ayman Kasir, Locum Gastroenterology Registrar

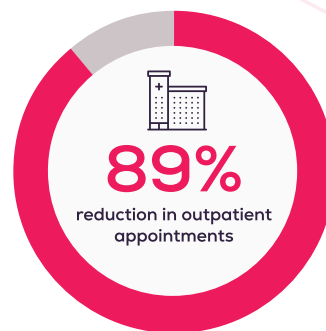

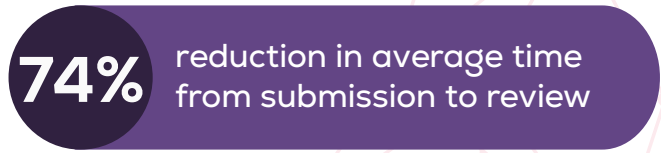

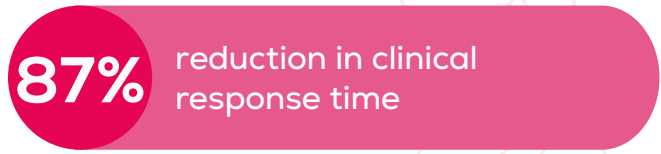

How to procure Bleepa

NHS organisations can procure Bleepa directly through the G Cloud 13 framework. It can be purchased and used across a hospital site or integrated care system.

Bleepa licences operate on a per user/per year subscription basis with discounts available for multiple users.

HM Government
G-Cloud

69% reduction in referral to treatment wait times
